of Porta Cabins & Shipping Containers**

Introduction

- 1) A Portable, demountable or transportable building is a building designed and built to be movable rather than permanently located.
- 2) Portable buildings are generally manufactured using sustainable and eco friendly materials.
- 3) From formal office accommodation to comfortable eating and relaxation areas, toilet and shower facilities to site security units portable cabins are fast to manufacture and easy to deliver.
- 4) A common modern design is sometimes called a modular building. But portable buildings can be different in that they are more often used temporarily and taken away later. Portable Building (e.g. yurts) have been used since prehistoric times.
- 5) Many modern types of portable buildings are designed so that they can be carried to or from the site on a large lorry and slung on and off by a crane.

What is Porta Cabin ?

- 1) Porta is the short form of portable, means portable cabin, which you can move around the globe from trailers.
- 2) Portable cabin is used where construction of office from cement & bricks is not easy, raw material not available then you go for Porta Cabin.
- 3) Porta cabins are a versatile solution for both residential and commercial spaces.
- 4) They can be used as project site office, conference staff accommodation, club houses, schools, hospitals, storage units etc.
- 5) Portability at office items is becoming increasingly popular.
